[Korloy's new PVD grade for steel machining, PC3600-MU]

— Products

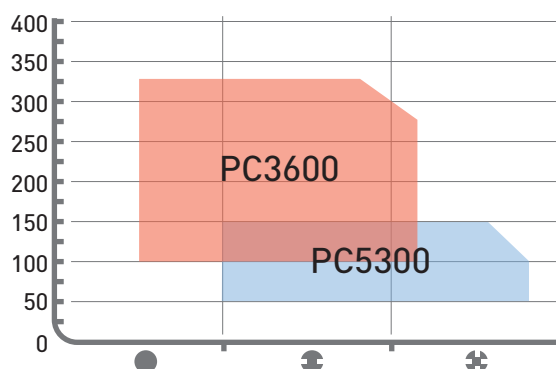

[PC3600-MU]

- ① SDKN1203AESN-MU ② SDKN1504AESN-MU ③ SPKN1203EDSR-MU
- ④ SPKN1504EDSR-MU ⑤ TPKN2204PDSR-MU

— Details

- PC3600 replacing the current grade, PC5300 can cover more general application ranges.
 - Improved wear resistance and impact resistance in high speed machining
 - Coating layer with high hardness and oxidation resistance at high temperature ensures stable tool life.
- More economical than PC3600-SU
- Applicable for more various applications

[Line up for P grades]

[Recommended grades for steel machining]

P	Grade	
	Main	Sub
Carbon steel	PC3600	PC5300
Alloy steel	PC3600	PC5300
Hardened steel	General hardened steel	PC3600
	High hardened deposited steel	PC5300
High hardened steel	PC5300	PC3600
		DBN500

— Launching Date

- From Jul. 2012
